[8] Energy claim based on the majority of colour laser MFPs <€500 excluding VAT as of September 2012. For details, see www.hp.com/go/officejet.

[9] Energy savings calculation assumes the device is scheduled to be off for 12 hours per weekday and 48 hours per weekend. Reduced energy use is compared with a typical daily usage model, which assumes devices remain in 'off' mode overnight and on the weekend.

[10] Compared with the majority of colour laser printers <€300 excluding VAT, colour laser MFPs < €500 excluding VAT, Sept/2012. Calculation compares weight of supplies and cartridge packaging needed for the same amount of pages based on highest-capacity cartridges ISO yield and continuous printing tested by Buyers Laboratory Inc, commissioned by HP as of 2013.
